Product Information & Key features

Key features

Allows for fast and easy clean up of spills on carpet or rugs:

The 10 cm hand tool makes quick work of removing spills or stain, and the clear Plexiglas nozzle make it easy to see the soil being removed. The powerful 2-stage vacuum motor giving 21,8 kPa vacuum to insure the carpet or rug is nearly dry after the spot is removed. The removeable recovery tank makes emptying simple and convenient.

Simple operation means very little operator training:

One switch controls the vacuum motor and pump power. The vacuum runs continuously, with the switch on, while the pump only operates when the spray trigger is pulled. The recovery tank is made of translucent white polyethylene, which makes it easy to see the level of dirty water. The WOLF130 is also equipped with a float mechanism inside the recovery tank to prevent dirty water from entering the vacuum motor.

Easy to transport to the location of the spill:

With two large wheels and a center mounted front caster, the WOLF130 can be pulled to the spill location, or it can be carried using the built-in handle. Even with it's 3,8 liter capacity solution tank full, the weight of the machine remains low.

Storage of the machine does not require a large space:

The small size make storage of the WOLF130 convenient. The standard blue mesh, drawstring bag makes storing the hoses and hand tool a breeze, while allowing them to stay dry, and odor free.

Customer understanding

- **Main customers are:**

  Building Service Contractor's, Schools, Retail, Hospitality, etc.
  Any facility with carpets, textiles furniture's and/or rugs.

- **Main applications are:**

| Spill/spot cleaning	Cleaning corners, or other areas not reachable with larger carpet extractors	Elevators or entrance areas
